1960 SOUNDS OF ENGINEERING SCIENCE

MSOE is cooperating with Milwaukee radio station WISN in a new series of public service programs. Known as "1960 Sounds of Engineering Science," the thrice-weekly broadcasts are 5-minute capsule discussions by MSOE faculty members on various aspects of scientific knowledge. The series is aimed at helping the general public gain greater familiarity with Space Age progress.

Coordinated by Associate Professor Timothy E. Clements, MSOE Dept. of Economics & Industrial Commerce, the series will cover such topics as solar cells, fuel cells, jet propulsion, magneto hydrodynamics digital computers, inert arc welding, metallurgy, plastics, and a variety of other subjects.

1960 Sounds of Engineering Science is heard twice on Saturday, at 12:25 and 8:25 p. m., and each Sunday, at 7:25 p. m., on radio station WISN, dial 1150.
